SHEERLINE[®]
ALUMINIUM WINDOWS AND DOORS

Prestige

our most comprehensive window and door system - stylish, thermally efficient and secure. Aluminium at its very best.

- Patented corner joint gives superior aesthetics and reduces misaligned corners

- Unique Thermavic® thermal break gives class leading thermal performance

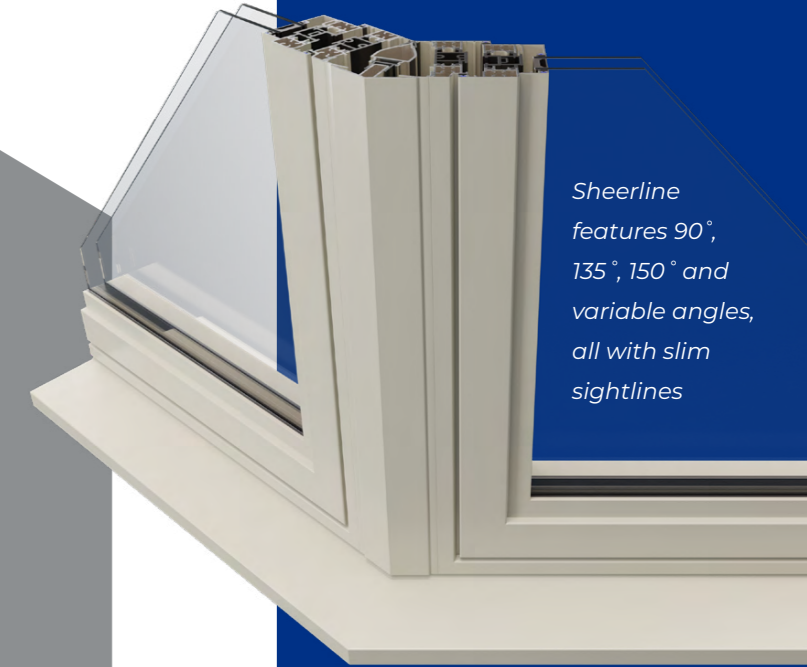

- Integrated system design dramatically reduces stock holding requirements

- Manufactured in-house in the UK, for a robust and agile supply chain you can rely on

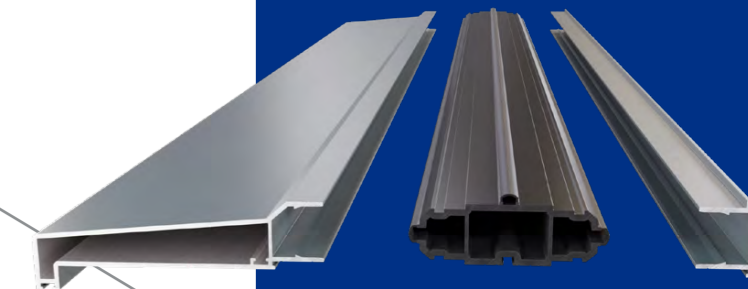

- Full depth Eurogroove accommodates a wide range of standard fenestration hardware

Innovative, high performance aluminium windows and doors

Sheerline features 90°, 135°, 150° and variable angles, all with slim sightlines

Designed, made and delivered by Sheerline

Manufactured in the UK, we design and make every aluminium and moulded component so we have the control to offer you unbeatable service. Sheerline profiles are available in five working days from a stocked range of 12 colours.

Easy to manufacture, reducing waste

Our patented corner jointing method does away with the need for crimping and specialised machinery, drastically reducing waste while also speeding up manufacturing. With Prestige being able to be manufactured on a single work bench with minimal training.

1.3 U-value

W/(m²K)

Double glazed*

W/(m²K)

Triple glazed*

The Thermavic® thermal advantage

Prestige provides exceptional thermal performance for up to A+ Window Energy Ratings,* using Thermavic's® closed-cell, insulating chambers to create class leading thermal performance, far superior to traditional polyamide thermal breaks.

Secured by Design

Official Police Security Initiative

PAS24

at launch

Security built-in as standard

Strong, reliable construction, coupled to dedicated hinge protectors and the inclusion of a full depth Eurogroove – giving access to the latest high security locks – makes Prestige one of the most secure aluminium window and door systems in its class.

Superior weather performance

Co-extruded weather-seals on clip-together cills and other ancillaries means there's minimal need for silicone sealing, saving time, money and creating more consistent, reliable and weatherproof installations.

Not just another aluminium system, Sheerline solves many of the issues experienced by aluminium installers and fabricators.

12 Colours in 5 Working Days including Dual Colours

See page 19 for the full colour range

*Patent registration number: GB2569209

*Subject to specification. A+ WER (Window Energy Rating) achievable with triple glazing, A WER with double glazing.

- 28mm double glazed with a clip in or shuffle bead. 36mm or 44mm triple glazing – for improved thermal and acoustic performance
- 17mm stack height for window hinges
- Both window & door lock cases are fully enclosed and don't break through into the glazing, or beading area
- Concealed drainage

Designed to be easy to manufacture, install and sell

We've built in lots of clever features, like the fact Sheerline cills finish flush with our outer frames, meaning windows fit perfectly vertically to plaster lines, improving the quality of installations.

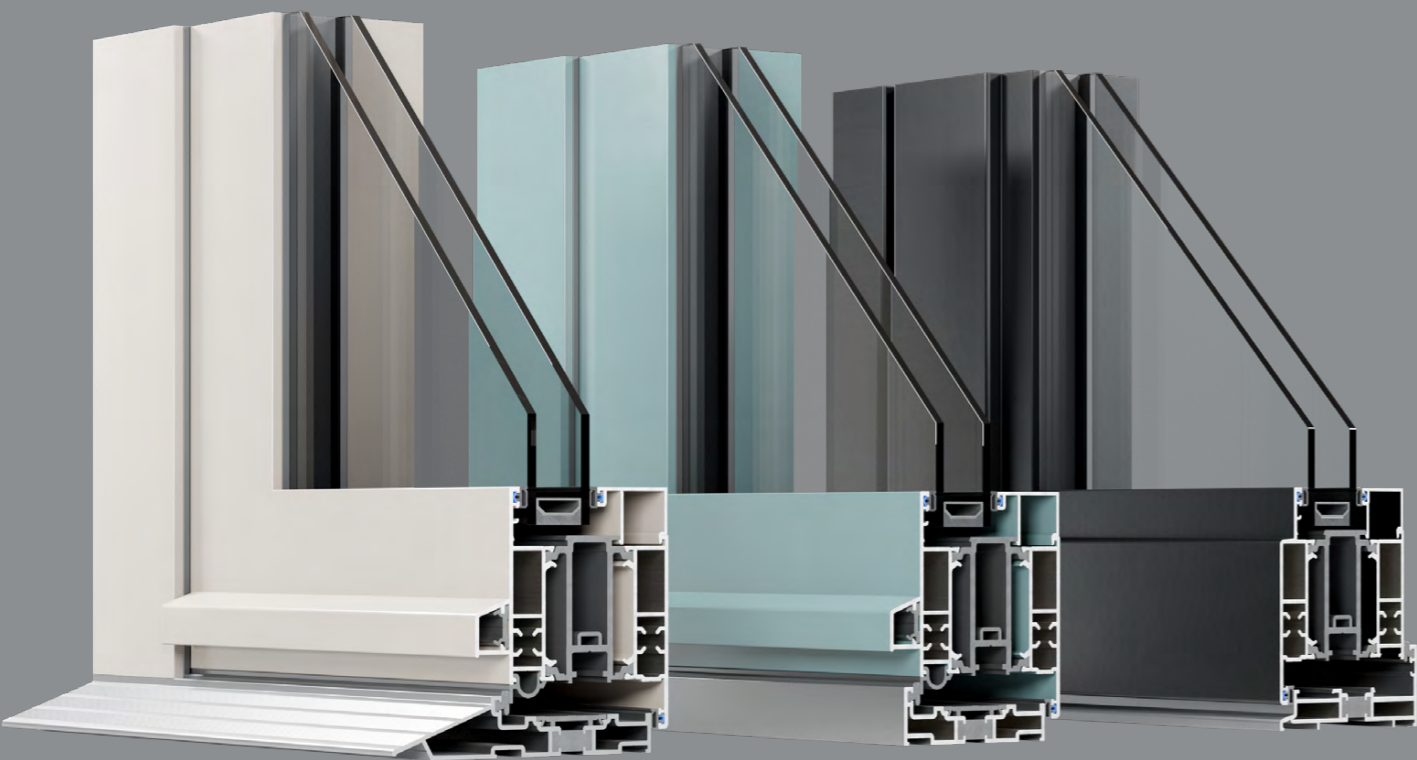

An integrated approach - across all our systems

All our systems share common components and are designed with consistent aesthetics and features, meaning you can confidently specify from across our range of products. Confident that aesthetics, colours, styles and sightlines will match perfectly across a project.

Available in a choice of two opening sash styles; 'Stepped' – inspired by traditional steel windows – and 'Contemporary' with a more modern minimalist aesthetic. Both styles are available in either our standard outer frame, or as a 'Flush' option that brings both the perimeter and the opening sash perfectly in-line.

Prestige is available from stock in three striking anodised finishes, as well as nine powder coated colours..

Prestige features three Part M compliant door thresholds. Door frames easily fix to these thresholds using a universal moulding that's hidden from view from the outside. A cover strip continues the high-end aesthetics, hiding the fixings, but can be slid under the moulding to aid removal.

Door range

Maximum hardware compatibility with a 35mm back set

The Prestige system covers both single and French doors, and perfectly match Prestige and Classic windows. Door sashes also support SFS 3D face mounted PAS24 hinges and the door midrail accommodates standard letterplates. Door combinations can also be manufactured with continuous thresholds that continue across any sidelights for neater and higher quality installations.

Sheerline *Prestige* products are available in the following colours

OUR TRADITIONAL COLOURS

All available in dual colour combinations.

THE CHARACTER RANGE OF PREMIUM COLOURS

All available in dual colour combinations.

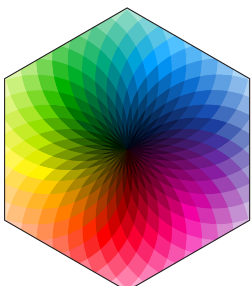

BESPOKE COLOURS

Please contact us for your requirements to discuss minimum order volumes. Available in Matt, Satin, Gloss or Textured finishes. All available in dual colour combinations.

THE PARAGON ANODISED RANGE

All available in dual colour combinations.

DISCLAIMER

Due to the variability of manufacturing processes and the differences in the methods used to represent these colours, we cannot guarantee an exact colour match between the actual paint colour and the colour as seen on-screen or when printed. The RAL colour references are also provided as a guide only and we recommend asking to see a physical sample prior to order if required. All colours and finishes are supplied within standard tolerance ranges.

Manufactured in the UK,
we design and make every
component so we can offer
unbeatable service and
unrivalled quality.
